

SAFETY DATA SHEET

KeyCast

Section 1. Identification		
GHS product identifier	: KeyCast	
Product code	: 4220000	
Other means of identification	: Not available.	
Product type	: Liquid.	
Relevant identified uses of Not applicable.	f the substance or mixture and uses advised against	
Supplier's details	: Keystone Industries 52 West King Street Myerstown, PA 17067 (856) 663-4700	
Emergency telephone number (with hours of operation)	: INFOTRAC: (800) 535-5053	
Section 2. Hazards identification		

OSHA/HCS status	: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Classification of the substance or mixture	: SKIN SENSITIZATION - Category 1 TOXIC TO REPRODUCTION (Fertility) - Category 2
	Percentage of the mixture consisting of ingredient(s) of unknown oral toxicity: 95.2% Percentage of the mixture consisting of ingredient(s) of unknown dermal toxicity: 98% Percentage of the mixture consisting of ingredient(s) of unknown inhalation toxicity: 99. 2%

GHS label elements Hazard pictograms

Signal word **Hazard statements**

: Warning

- : May cause an allergic skin reaction. Suspected of damaging fertility.

Precautionary statements

Prevention

: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves. Wear eye or face protection: Recommended: chemical splash goggles and/or face shield. safety glasses with sideshields.. Wear protective clothing: Recommended: Nitrile gloves. Neoprene gloves.. Avoid breathing vapor. Contaminated work clothing must not be allowed out of the workplace.

Section 2. Hazards identification

Response	: IF exposed or concerned: Get medical attention. IF ON SKIN: Wash with plenty of soap and water. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical attention.
Storage	: Store locked up.
Disposal	: Dispose of contents and container in accordance with all local, regional, national and international regulations.
Hazards not otherwise classified	: None known.

Section 3. Composition/information on ingredients

Substance/mixture	: Mixture
Other means of	: Not available.
identification	

The specific chemical identity and exact concentration of the ingredient(s) listed below are being withheld as a trade secret.

Ingredient name	CAS number	EC number	INCI Name	%
Proprietary Ingredient #1	-	-	-	≤5
Proprietary Ingredient #2	-	-	-	≤3
Proprietary Ingredient #3	-	-	-	≤2.2

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact	eyelids.	ely flush eyes with plenty of Check for and remove any c Get medical attention if irrita	ontact lenses. Continue

Section 4. First aid measures

such as a collar, tie, belt or waistband.

Most important symptoms/effects, acute and delayed

Potential acute health effe	<u>cts</u>	
Eye contact	:	No known significant effects or critical hazards.
Inhalation	:	No known significant effects or critical hazards.
Skin contact	:	May cause an allergic skin reaction.
Ingestion	:	No known significant effects or critical hazards.
Over-exposure signs/sym	ptom	<u>15</u>
Eye contact	:	No specific data.
Inhalation	:	Adverse symptoms may include the following: Suspected of damaging fertility.
Skin contact	:	Adverse symptoms may include the following: Suspected of damaging fertility. redness irritation
Ingestion	:	Adverse symptoms may include the following: Suspected of damaging fertility.
Indication of immediate me	<u>dica</u>	l attention and special treatment needed, if necessary
Notes to physician	:	Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatments	1	No specific treatment.
Protection of first-aiders	:	No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media					
Suitable extinguishing media	: Use an ex	tinguishing agent suitable	for the surrounding	fire.	
Unsuitable extinguishing media	: None know	vn.			
Specific hazards arising from the chemical	: In a fire or	if heated, a pressure incr	ease will occur and	the container may burst.	
Hazardous thermal decomposition products	carbon dio carbon mo phosphoru	onoxide	e the following mate	rials:	
Special protective actions for fire-fighters		solate the scene by remov fire. No action shall be tal			
Special protective equipment for fire-fighters		rs should wear appropriat (SCBA) with a full face-pi			eathing
Date of issue/Date of revision	: 8/13/2018	Date of previous issue	: 12/4/2017	Version : 1	3/12

contaminated clothing thoroughly with water before removing it, or wear gloves.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures				
For non-emergency personnel	: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.			
For emergency responders	: If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".			
Environmental precautions	: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).			
Methods and materials for co	ntainment and cleaning up			
Small spill	: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.			
Large spill	: Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.			

Section 7. Handling and storage

Precautions for safe handling	L	
Protective measures	:	Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
Advice on general occupational hygiene	:	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	:	Do not store above the following temperature: 38°C (100.4°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

4/12

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits	
Proprietary Ingredient #1 Proprietary Ingredient #2 Proprietary Ingredient #3	None. None. AIHA WEEL (United States, 10/20 Absorbed through skin. TWA: 1 mg/m ³ 8 hours.	911).
Appropriate engineering controls	If user operations generate dust, fumes, gas, vapor or mist, use process end local exhaust ventilation or other engineering controls to keep worker expose airborne contaminants below any recommended or statutory limits.	
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to they comply with the requirements of environmental protection legislation. In cases, fume scrubbers, filters or engineering modifications to the process ec will be necessary to reduce emissions to acceptable levels.	n some
Individual protection measure		
Hygiene measures	Wash hands, forearms and face thoroughly after handling chemical products eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated of Contaminated work clothing should not be allowed out of the workplace. Wa contaminated clothing before reusing. Ensure that eyewash stations and sa showers are close to the workstation location.	clothing. ash
Eye/face protection	Safety eyewear complying with an approved standard should be used when assessment indicates this is necessary to avoid exposure to liquid splashes, gases or dusts. If contact is possible, the following protection should be wor the assessment indicates a higher degree of protection: safety glasses with shields. Recommended: chemical splash goggles and/or face shield. safety with side-shields.	, mists, 'n, unless side-
Skin protection		
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard worn at all times when handling chemical products if a risk assessment indic necessary. Considering the parameters specified by the glove manufacturer during use that the gloves are still retaining their protective properties. It sho noted that the time to breakthrough for any glove material may be different for glove manufacturers. In the case of mixtures, consisting of several substance protection time of the gloves cannot be accurately estimated.	cates this is r, check ould be or different
Body protection	Personal protective equipment for the body should be selected based on the performed and the risks involved and should be approved by a specialist bef handling this product. Recommended: Nitrile gloves. Neoprene gloves.	
Other skin protection	Appropriate footwear and any additional skin protection measures should be based on the task being performed and the risks involved and should be app specialist before handling this product.	
Respiratory protection	Based on the hazard and potential for exposure, select a respirator that mee appropriate standard or certification. Respirators must be used according to respiratory protection program to ensure proper fitting, training, and other im aspects of use.	ра

Section 9. Physical and chemical properties

Appearance

Physical state	1	Liquid.
Color	4	Violet.
Odor	1	Acrylic [Slight]
Odor threshold	1	Not available.
рН	1	Not available.
Melting point	1	Not available.
Boiling point	1	>100°C (>212°F)
Flash point	1	Closed cup: >100°C (>212°F)
Evaporation rate	1	Not available.
Flammability (solid, gas)	1	Not available.
Lower and upper explosive (flammable) limits	1	Not available.
Vapor pressure	1	Not available.
Vapor density	1	Not available.
Relative density	1	Not available.
Solubility	1	Partially soluble in the following materials: acetone. Very slightly soluble in the following materials: cold water and hot water.
Solubility in water	1	Not available.
Partition coefficient: n- octanol/water	:	Not available.
Auto-ignition temperature	4	Not available.
Decomposition temperature	1	Not available.
Viscosity	:	Dynamic (room temperature): 600 to 1200 mPa⋅s (600 to 1200 cP)
Flow time (ISO 2431)	:	Not available.

Section 10. Stability and reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Hazardous reactions or instability may occur under certain conditions of storage or use.
Conditions to avoid	: Storage > 38 °C (100 °F), exposure to light, loss of dissolved air, and contamination with incompatible materials.
Incompatible materials	: Polymerization initiators, including peroxides, strong oxidizing agents, alcohols, copper, copper alloys, carbon steel, iron, rust, and strong bases.
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
Proprietary Ingredient #1	LD50 Oral	Rat	>5000 mg/kg	-
Proprietary Ingredient #3	LD50 Dermal	Rabbit	5170 mg/kg	-

Irritation/Corrosion

Product/ingredient name	Result	Species	Score	Exposure	Observation
Proprietary Ingredient #1	Eyes - Moderate irritant	Rabbit	-	60 milligrams	-
	Skin - Moderate irritant	Human	-	72 hours 100 milligrams Intermittent	-
	Skin - Moderate irritant	Rabbit	-	500 milligrams	-
Proprietary Ingredient #3	Eyes - Moderate irritant	Rabbit	-	100 milligrams	-
	Skin - Moderate irritant	Rabbit	-	24 hours 500 milligrams	-

Potential acute health effects

Eye contact	: No known significant effects or critical hazards.
Inhalation	: No known significant effects or critical hazards.
Skin contact	: May cause an allergic skin reaction.
Ingestion	: No known significant effects or critical hazards.

Symptoms related to the physical, chemical and toxicological characteristics

Section 11. Toxicological information

Eye contact	: No specific data.
Inhalation	: Adverse symptoms may include the following: Suspected of damaging fertility.
Skin contact	: Adverse symptoms may include the following: Suspected of damaging fertility. redness irritation
Ingestion	: Adverse symptoms may include the following: Suspected of damaging fertility.

Delayed and immediate effect	ts	and also chronic effects from short and long term exposure
<u>Short term exposure</u>		
Potential immediate effects	1	Not available.
Potential delayed effects	:	Not available.
<u>Long term exposure</u>		
Potential immediate effects	1	Not available.
Potential delayed effects	:	Not available.
Potential chronic health effe	ect	<u>s</u>
Not available.		
General	:	Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.
Carcinogenicity	:	No known significant effects or critical hazards.
Mutagenicity	:	No known significant effects or critical hazards.
Teratogenicity	:	No known significant effects or critical hazards.
Developmental effects	:	No known significant effects or critical hazards.
Fertility effects	:	Suspected of damaging fertility.

Numerical measures of toxicity

Acute toxicity estimates

Section 16. Other information

Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.
