THE NEW GOLD STANDARD.

R5. The 5-axis milling machine for non-stop wet and dry production.

"TALKING ABOUT PRECISION AND SPEED, THIS MILLING MACHINE IS TRULY UNPARALLELED."

Miguel Stanley, DDS Founder and Clinical Director of White Clinic, Lisbon, Portugal

_vhf

YOUR TICKET TO THE DENTAL HALL OF FAME.

Simply process everything, 24 hours a day.

With the R5 you play in a new league of productivity: non-stop milling and grinding with maximum material freedom. You save valuable time by one-hand loading the changer with up to ten disks; this **DirectDisc**Technology is patent-pending.

And there is more! Switch quickly and effortlessly between wet and dry machining with the **DirectClean**Technology. An ingenious package of ionizer, self-cleaning and dryer enables you to produce first-class restorations around the clock.

Save time through automation.

Up to ten discs or 60 blocks or abutments can be processed without interruption. The easy-to-load, removable changer for 16 tools enables a production without user intervention.

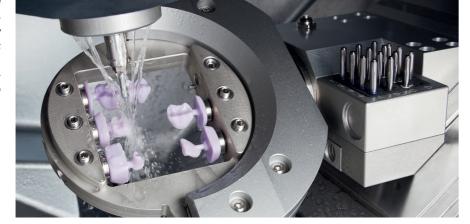

Reliability meets accuracy.

The R5 offers German engineering at its best – with an impressive 150 kilograms of weight on a minimal footprint. The result: a machine rigidity that meets the highest demands. A repetition accuracy of the linear axes of ±0.003 mm guarantees maximum precision in UltraHD and lowest-vibration operation.

The R5 swivels the spindle (B axis) by up to $\pm 35^{\circ}$. This means that the workpiece holder only needs one moving axis (A axis) and the entire system gains stability.

For wet machining, the R5 grinds and mills with clear water. For all materials, except titanium, without any additives – better for your materials and without annoying disposal. Moreover, the DirectClean-Technology enables a swift switch to dry milling.

A FLAGSHIP THAT IS MOST COMFORTABLE TO NAVIGATE.

Highest Precision

- Restorations in ultra HD
- High-precision spindle with 800 watts of power and 80,000 RPM
- 3 microns repetition accuracy

Absolute Independence

- Sheer unlimited material accessibility in 98 mm disc format, 38 block materials, and 800+ titanium and CoCr prefab abutment blanks
- · Covers the broadest range of indications, due to ±35° rotation angle in the 5th axis, and up to 40 mm discs

Powerful and Robust

- - all Ti and CoCr • Proven industrial quality

Unmatched Reliability

- 100% engineered and manufactured in Germany Comprehensive sensor technology to monitor all vital system functions

remote monitoring • 24-month warranty

A MATTER OF FACTS. TECHNICAL DATA.

GENERAL		
Fields of application	Wet and dry machining	
Materials	Plastics, wax, zirconia, composites, CoCr, model plaster, glass ceramics, titanium	
Indications	Crowns, bridges, fully anatomical crowns and bridges, inlays, onlays, abutments, telescopic crowns, models, model casting bite splints, implant bars, veneers, drilling templates, dentures, etc.	
BASIC SYSTEM		
Construction	Machine bed of massive aluminum cast	
Number of axes	5	
Drives	Precise ball screw spindles for the 3 linear axes \cdot motor resolution <1 μ m \cdot ground steel precision guide rails	
Repetition accuracy linear axes	±0.003 mm	
Housing	Complete encapsulation of the working chamber with automatically lockable front cover - automatic cover for blank changer	
Working chamber illumination/camera system	4 RGB LED with status indication, 3 of them in the working chamber and 1 in the blank changer - camera in working chamber for easier support	
Dimensions (W/D/H)	Approx. 580 × 600 × 700 mm (required seating area: approx. 490 × 294 mm · housing fully open: approx. 580 × 720 × 880 mm)	
Weight	Approx. 150 kg	
Treight	· • • • • • • • • • • • • • • • • • • •	
ROTARY AXES	1	
Features	A axis: Harmonic Drive [®] free from backlash for highest true running accuracy · rotation range: 360° infinitely B axis: precise ball screw spindle · rotation range: ±35°	
Fixing device	Round universal blanks with a thickness of 10 to 40 mm and 98.5 mm diameter with step \cdot for block machining: 6-fold block holder for blocks up to 40 × 20 × 20 mm	
Exchange of workpieces	Automatic changer for up to 10 discs	
CONTROLLED		
CONTROLLER Features	Simultaneous interpolation of 5 axes · depending on the country, a separate control of 3 and 2 axes each might be necessary due to export regulations	
SPINDLE Features	Rotational speed range up to 80,000 RPM \cdot Peak power (P_{max}): 800 Watt \cdot nominal power under periodic operation (S6): 600 Watt \cdot nominal power under continuous operation (S1): 440 Watt \cdot 4-fold bearing \cdot hybrid ceramic ball bearing \cdot concentricity deviation at the inner taper of the precision shaft <3 μ m \cdot sealing air prevents entering of debris or moisture in the bearing area \cdot cone cleaning	
Collet chuck	Pneumatic stainless steel collet chuck with ceramic coating for tools with 3 mm shank diameter and max. 40 mm total length	
Collectifick	Theumatic stanless steel collect chick with ceramic coating for tools with 5 min shark diameter and max. To min total length	
TOOL CHANGE		
Features	Automatic tool changer for 16 tools with length detection and tool breakage monitoring via measuring key · exchangeable tool changer inserts	
WET GRINDING		
	Pliquid portes at the spindle integrated records (2 liters) for cooling liquid protection of machanics electronics and	
Features	8 liquid nozzles at the spindle · integrated reservoir (3 liters) for cooling liquid · protection of mechanics, electronics and spindle by flexible rubber gaiter · no grinding additives necessary except for milling titanium	
SUCTION	1	
Features	Opening at the housing side for air extraction \cdot underpressure sensor for monitoring the air extraction \cdot 24 Volt output for switching suction units	
OTHER		
Additional equipment	For abutment production: holders for various systems	
Special features	North America model: certification according to ANSI/UL 61010-1 for USA and Canada	
special leatures	North America model, certification according to Avoi/oE 01010-1101 05A and Canada	
CONNECTION REQUIREMENTS		
Compressed air supply	6 bar · 100 l/min – 8 bar · 110 l/min · air purity see ISO 8573-1:2010	
Power supply	100 – 240 Volt · 50/60 Hz, max. 750 Watt	
Network	Ethernet RJ45 port for communicating with the computer	
ENVIRONMENTAL CONDITIONS		
Temperature and relative humidity	Between 10 °C and 35 °C · relative humidity: max. 80%, non-condensing	
SCOPE OF DELIVERY	4	
Inclusive	Spindle service set · power cable · Ethernet network cable (type: straight) · pneumatic hose · torque wrench (1.8 Nm – for mounting blocks) · hex key (2.5 mm) · crevice nozzle (for cleaning the working chamber) · interdental brush (for cleaning the nozzle plate) · cleaning brush · drill (2.8 mm) for tool positions · tool magazine insert · calibration set (1 micrometer, blanks for manufacturing test and calibration specimen) · measuring pin · block holder · carrying aid for transporting the machine · printed operating instructions

The future of dental manufacturing comes from vhf: with the flagship machine R5, there are no limits.

CREATING PERFECTION.

For more than 30 years.

As CAM solution provider, vhf carefully develops and produces every single milling machine and the perfectly matching tools and CAM software. Everything from one source, Made in Germany.

Support. A topic close to our hearts.

The service of your machine is important to us: We train our sales partners according to the highest requirements – so you receive first-class support for your R5.
