★ FUSION AM

Fusion AM is a CoCr dental alloy powder with improved properties for the production of dental restorations by laser melting. The dental alloy is a CoCr composition already known on the market and has been redesigned and improved by Scheftner. Due to its composition, the powder is suitable for PBF equipment already on the market, without the need for process and parameter changes. The manufacturing process of the powder ensures the best flowability and consequently the safety of a homogeneous coating.
